

Custom information regarding REACH

Dear Customer,

2018-02-01

June 1st 2007, the European Regulation (EC 1907/2006) concerning Registration, Evaluation, Authorization and Restrictions of Chemicals (Reach) entered into force.

The Reach regulation requests manufactures and importers to EU to register their chemical substances, on their own or in preparations or articles, in quantities of one tone or more per year. Companies who have pre-registered their substances (from 1 June to 30 November 2008) can benefit from extended registration deadlines from 1 December 2010 to 1 June 2018, depending on the quantities and the hazardous properties of the substance. Without pre-registration, substances have to be registered immediately.

Pipelife Sverige AB assures with this letter that we are aware of the consequence of the Reach-regulation and that we will follow the requirements.

- Pipelife Sverige AB does not manufacture or import any substances in quantities of 1 tone or more. Therefore, we are excepted from the requirements of any registration due to REACH.
- Pipelife Sverige AB uses substances and preparations as a “down-stream user. We have contacted our important suppliers for information about their intentions due to REACH.
- Our products do not contain any substances on the candidate list of substances of very high concern for authorization. We continuously supervise the candidate list.

If the Reach-regulation will affect the quality of our products or our opportunities to deliver to you, we will inform You so that we can agree on appropriate measures.

Your Reach contact partner at Pipelife Sverige AB is:
